

# Firmware 8.5.4 Release Notes

Release Date: Feb 16, 2026

## Devices Supported

This firmware release supports the following devices:

|                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| FusionHub          |                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| SpeedFusion Engine | SFE CAM                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Important Notices

- Firmware version 8.5.4 for Balance 310 HW5 is not included in this release. A separate firmware build will be released shortly to address the relevant fixes for this model.
- For FusionSIM and RemoteSIM users, it is suggested to upgrade the SIM Injector to [Firmware 1.2.5 \(Release Notes\)](#)
- Further major firmware updates will NOT support the following models. They will receive Firmware 8.5.x maintenance releases as needed.

- Firmware 8.5.2 or above: SpeedFusion VPN is not compatible with devices running Firmware 8.0.0 or below.
- AP Controller users with the Wi-Fi Operating Country set to Taiwan or Brazil must review their Wi-Fi channel configuration and reapply the settings
- **InControl** must be enabled on **PrimeCare** devices to update software features such as SpeedFusion (Bonding, Smoothing, Hot Failover).

## Improvements
