SpeedFusion
Relay

Remotely

Connect

to your home network

like you never left the house

SpeedFusion Relay

Peplink router

Any home router

Supercharge your home router into an extra endpoint for your SpeedFusion Network

Internet access like you never left

The SF Relay allows you to access the Internet through your router even if you're physically away from it.

SpeedFusion Relay

peplink

Access devices in your network through a private tunnel

With **InTouch**, users can access all services and applications hosted on devices within a network from outside the network.

Private tunnel

InTouch

Flexible remote support

For service providers, plug in the SF Relay to your customers' device and have **tech support** access their router without leaving the office.
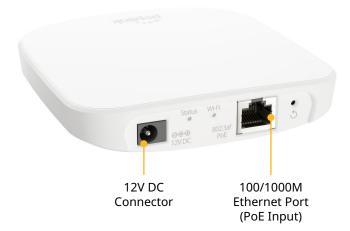

Plug and Play

Installation is **straightforward and simple**.
Plug in the SF Relay to your router and voilà, a new addition to your **SpeedFusion network**.
