

POTS Adapter Firmware 1.2.0

Release Notes

Release Date: May 27, 2026

[Changes since version 1.1.5](#)

New Features

Reference	Description
412	[RC 2] Added support for SIP TLS and DTLS-SRTP.
407	[RC 1] Added SIP VoIP feature support.

Improvements

Reference	Description
418	[RC 3] Improved SIM priority handling to allow the device to switch to Peplink eSIM when the Nano-SIM is deactivated.
419	[RC 3] Added Message Waiting Indicator (MWI) support for VoIP.
420	[RC 3] Added a Default Dial Plan setting to support carrier dial plans that require additional call handling, such as call redirection.
421	[RC 3] Added a Tone Detection setting to allow fax/modem tone detection to be disabled when Data Mode is enabled.
384	[RC 3] Expanded the supported character range for VoIP Display Name, User Name, Authentication Name, and Authentication Password fields.
422	[RC 3] Added VoLTE support for Rogers in Canada.
414	[RC 3] Improved Custom APN settings by automatically removing unnecessary whitespace.
397	[RC 2] Updated the VoIP/VoLTE User Agent format.
242	[RC 1] Added support for configuring network bands independently for each SIM.
409	[RC 1] Updated VoLTE carrier information for Bell Mobility and Telus in Canada.
408	[RC 1] Added the feature to remove the US country code from caller ID.

Resolved Issues

Reference	Description
411	[RC 1] Fixed SIM switching issue when only one SIM remained after eSIM download.
410	[RC 1] Fixed T-Mobile call forwarding issue.
